

Your Future Begins Now!

AfterHours

CTE HEALTH SCIENCES LNA PROGRAM

Nursing Assistant Program

New Hampshire is expected to see a significant increase in healthcare-related job opportunities. Healthcare practitioners and healthcare support occupations are projected to account for approximately 9,500 new jobs by the year 2030, which represents nearly 20 percent of all the new jobs expected in the state during that decade.

The **After Hours** Licensed Nursing Assistant (LNA) training program is designed to equip eligible candidates with the necessary skills and knowledge to work as nursing assistants in a professional capacity. Upon successful completion of the program, students will be fully prepared to take the state certification examination. Additionally, they will have the necessary qualifications to apply for an LNA license through the Board of Nursing.

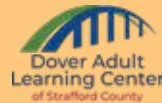

AfterHours

CTE HEALTH SCIENCES LNA PROGRAM

After Hours is an exciting joint initiative piloted by the Dover Adult Learning Center and the Dover Regional Career and Technical Center. Through this collaborative effort, students will engage in hands-on experiences that form an essential part of Career and Technical Education (CTE.) They will gain valuable real-world knowledge that directly applies to their future job prospects and careers — and also can provide the opportunity to earn credit towards a high school diploma.

Eligibility: All students will be interviewed and evaluated on their ability to read, comprehend, write and communicate relative to Nurse Assistant job related assignments. Adult Learners will be given the TABE test to determine language proficiency and literacy levels. Support will be provided for those needing to build their foundational skills.

Cost: Tuition and fees for the **After Hours** pilot program are grant funded by the Bureau of Career Development and Adult Education.

Unlock Your Potential

Dover's comprehensive Licensed Nursing Assistant (LNA) program is designed to equip eligible adult learners and high school seniors with the skills and knowledge necessary for the workforce. We understand the importance of a solid foundation and practical experience, and our NH Board of Nursing approved program is tailored to meet those needs.

Our curriculum focuses on real-world applications that bridge the gap between education and industry demands. With hands-on learning, industry collaborations, and clinical site training, you will gain invaluable experience and build a professional network. Our experienced instructors are dedicated to providing personalized guidance and support throughout your learning journey, ensuring that you receive the individual attention you need to thrive.

The Program Consists of Three Components:

Part One: Theory

Learn about basic anatomy and physiology, medical terminology, infection control, patient care techniques, medical ethics and legal considerations, as well as communication and documentation skills.

Part Two: Pre-clinical lab skills

Acquire essential competencies in a controlled laboratory setting. Develop skills in patient interactions, daily care activities, vital signs monitoring, mobility and transfers, patient observations, and infection control. Obtain proficiency in the use of medical terminology, equipment and technology.

Part Three: Clinical

Gain practical experience in real healthcare settings under supervision. Through hands-on training, learn to provide compassionate care, ensure patient comfort, and maintain a safe environment. Clinicals bridge the gap between theory and practice, equipping nursing assistants with the competence and confidence to excel in their roles as healthcare professionals.
